

Dear (Recipient First Name),

Welcome to 2008!

We trust that the transition from Christmas festivities back to business has not been too painful and that you have kick-started the year with a BANG! At Cosmos we have commenced the year running, and are ready for the challenges and rewards that the coming year is likely to bring.

Changes are ahead for the Cosmos team with the farewell of Vesna Zuban, our Administration Assistant. At this stage we do not yet have a replacement for Vesna, so if you know anyone interested in a challenging and rewarding Administration position, please refer them to us ([more information here](#)).

Once again, we wish you all the very best for 2008 and we look forward to an amicable and rewarding working year together.

> **Introducing VST
(Very Smart Technology)!**

- Do you get frustrated by the number of hours your managers spend filling out paper checklists, recording temperatures and writing in food safety books
- Are you tired of information being inaccurately recorded, or not recorded at all?
- Do you ever wonder what it is your cleaning staff actually do when you're not around?

Well we have the answer you've been looking for - you need some Very Smart Technology in your business! The COSMOS 21+ Group is pleased to announce the introduction of **VST**, a mobile software application that can be installed on most handheld devices running Windows Mobile or Pocket PC.

VST is a fully portable system that removes the need for paper checklists, makes cumbersome HACCP recording easy and makes your staff accountable for everything they do. Some of the amazing features are:

- A system which is fully compliant with HACCP regulations and eliminates the need to fill out time consuming paperwork
- Integrated Bluetooth temperature probes - no more incorrect recording of temperatures
- Bar coded stations around your store - if managers say they've checked the bathrooms, they had to have been there to check!
- No more reams and reams of paper checklists - it's all electronic!
- Checklists can be locked down to certain timeframes - you can't do the morning checklist in the afternoon...
- Maintenance or cleaning staff can be held accountable for their time - even while there is no one else around!
- A fast return on your investment

If you would like any more information regarding this

Attn: PAR Customers

- Do you have PAR Exalt version 2:02 Point of Sale?
- Do you use EFTPOS?
- Are you sick and tired of your EFTPOS information being entered INCORRECTLY?

If the answer to all of these questions is yes, then we have a solution for you!

The COSMOS 21+ Group has developed an interface to collect all EFTPOS Sales and Cash Out information from your PAR Point of Sale into OnTarget. This means no more manual entry and no more mistakes!

The OnTarget configuration takes no more than half an hour, and can be completed at any time during business hours, Monday to Friday. To have this timesaving utility implemented in your store please call one of our helpful Support Team members on **1300 139 909** and book in a time today.
